

Special Needs Transportation

Routing and Planning Made Easy

Routefinder Pro from Transfinder has everything you need to manage your special needs transportation operations more effectively. The user-friendly solution enhances your planning power, information control and communication ability, resulting in a more efficient, safer and more reliable transportation operation.

Routefinder Pro provides a valuable way to store and retrieve all of the data about special needs students, special needs vehicles, along with the routes and schedules used to transport students to schools and facilities.

Routefinder Pro has you covered.

From fleet size, bus-loads, vehicle size, seating capacity, ride times, student needs, rider eligibility, mileage, stop locations, safety concerns and district policies, Routefinder Pro is your management solution. You can more easily:

COORDINATE – Control daily, weekly, or even hourly management of re-routing and rescheduling required with special needs transportation. With **Unlimited Shuttle Runs**, you can create unlimited shuttles and expedite student assignments by simplifying logistics and increasing manageability.

ACCOMMODATE – Simplify transportation complexities and have the freedom to manage ever-changing routing operations. Perform route changes based on variations in addresses and calendars, and accommodate the many route changes required to transport students to their homes or to alternate care facilities.

DIFFERENTIATE – Students with special needs require unique tracking. In addition to having limitless codes for tracking disabilities, Routefinder Pro has customizable fields that enable you to store information about specific medical conditions and educational programs to ensure that appropriate and timely preparations are made.

COMMUNICATE – By integrating GPS data into Routefinder Pro through our **Busfinder** interface, your special needs routes will have more accurate pick-up and drop-off times. With **Infofinder i**, you can then easily communicate with parents and guardians via your district's website and notify them via email concerning schedules, stops or vehicle changes.

With Routefinder Pro, you can:

- Easily manage bus routes, students and drivers;
- Analyze bus routes and pickup sites, and quickly adjust to changes;
- Create and analyze “what/if” scenarios to improve service and lower operating costs;
- Seamlessly integrate with district-wide student information systems;
- Increase efficiencies, enhance services, and reduce costs;
- Manage student and school calendars and be able to make optimal route changes;
- Perform efficient route changes based on variations in calendars and addresses; and
- Track and report the complete history of a student, including student movement, program changes, and transportation changes.

“Routefinder Pro has been especially beneficial for managing transportation for our special needs students. Geo-coding provides a visual aid that allows us to be as exact as possible on the arrival time for each stop, which is so important for our parents and students. Drivers know exactly where they are going, what time they should arrive, who they will pick up, and to what campus they need to be delivered.”

Abel Balli - Special Education Supervisor
Victoria ISD, Victoria, TX
